

Home-Designed High School

By Diana Johnson

Home-Designed High School is a handbook for homeschooling a high school student. It contains all the information you need to plan and execute high school including information on how to choose curriculum, grading, transcripts, and vocational and college preparation.

Those who are starting the homeschooling adventure in the high school years will find this book to be a lifesaver. When there is no time for mistakes and making up the learning curve, you need solid advice that will help you to ask all the right questions. For veteran home educators, this book will be a trusted friend and a reliable source of information to pass on to others. We recommend that both the parent and the student read this book and use it as a guide for discussion, planning, and completing high school studies.
