

Hands On Science camp!

Making science fun!

One Day or week long camps!

- Participate in experiments, skits, crafts, and interactive games!
- Create our own erupting volcanoes with “rainbow lava”!
- Build our own boats and see which ones hold the most cargo and float!
- Use a 3-D microscope to look at insects, plants, and things we find in nature!
 - Make a nature journal.
 - Make our own “ocean waves” and “fireworks in a jar” as we learn about mixtures!
 - Construct and launch our own rockets... We’ll see which ones go the highest as we learn about chemical reactions!
 - Think “like a scientist” as we build a gum drop tower!
 - Make our own bug habitats as we learn about insects. Each child will get some insects to put into his/her habitat!
 - Be creative as we paint “buggy” T-shirts to wear home!
 - Make our own invisible ink and discover how to make it visible!
 - Construct an insect pop-up book!

All Hands on!

***Instructor has master’s degree in curriculum and instruction and has taught in both public and private schools in the Knoxville area.

*Contact Lisa Haskell 765-1207 before slots fill up! Or e-mail your name, student’s name, phone number, and dates that your child will attend to lisahaskell@tds.net.

Dates:

- June 5 Cedar Springs Bookstore (west) 10:30-3:30
